## IMPORTANT INFORMATION EXPLAINED

**Historic Yield.** The level of yield actually achieved on your portfolio will be dependent on the tax treatment of the product you have invested in and your personal tax circumstances. The historic yield data is calculated using the previous year's dividend information and the bid or mid price from the last dividend. Estimated gross yield is not a reliable indicator of future returns.

**Asset Allocation.** Clients investing in the strategy for the first time, either via new business or a switch, will have their portfolio determined by the fund and asset allocations set at the last rebalance date. The asset allocation is shown at a point in time reflecting the last rebalance date. Due to market movements there will be a difference in the asset allocation of existing clients' portfolios as at the date of the factsheet.

**Capital Gains.** Our MPS does not take unrealised capital gains into account when making changes to client portfolios. This means there may be occasions when realised gains are in excess of your Annual Exempt Amount (AEA), which may result in you having to pay capital gains tax (CGT).
